

Managed Detection and Response

You'll deploy powerful, comprehensive threat prevention and response capabilities with our SOC-as-a-Service capabilities. Managed Detection & Response takes a "prevention-first" approach to stopping attacks and optimizing defenses. It's powered by Check Point ThreatCloud and our expert analyst, incident response and research teams. With 24x7x365 monitoring of your security infrastructure, you'll gain industry-leading SOC capabilities without having to build and staff a large internal organization.

Benefits

- **Optimize end-to-end prevention:** Leave no area uncovered- we monitor network, endpoint, email, cloud and IoT environments.
- **Elevate your security posture:** Threat monitoring is informed by advanced threat intelligence and AI-based analytics to deliver powerful threat prevention and automated response.
- **We make it simple:** One solution, one dashboard. A web portal gives you insight to prevent, monitor, detect, investigate and remediate attacks all in one place.

 **Most relevant roles**
CISO, Cybersecurity Operations Managers/Directors Practitioners: SOC Analysts, Incident Response Analysts, Forensics Investigators
